

EEB is hosting a non-profit organization that specializes in conservation abroad. They will be giving a presentation on **Thursday, October 22nd at 5PM in TLS 154**. They are interested in recruiting students from a variety of majors and backgrounds as the presentation is designed for all students looking to gain cultural experiences, credits, independent research credits, internships and qualifications abroad.

Please direct all questions to:

Jennifer Murphy
Undergraduate Coordinator
Ecology & Evolutionary Biology
Torrey Life Science, Room 372
75 N. Eagleville Road, Unit 3043
Storrs, CT 06269
(860) 486-3644 Office/Voice
(860) 486-6364 Fax

More information about the organization:

Frontier is a non profit, non government conservation organization. Frontier was established in 1989 in Tanzania, a country we are still working in today! Our HQ is based in London, and we aim to have a second office in the States for 2010! Frontier now runs 250 projects in 50 countries spanning 5 continents. Frontiers volunteer programs range from our Science / Biodiversity research to Teaching, Community and wildlife conservation programs.

The Science/Biodiversity research programs allow the students (volunteers) to work in a professional research environment alongside research scientists. The aim is to build protected areas and national parks thus ensuring the preservation and discovery of new species whilst generating sustainable livelihoods! We currently work alongside, Wildlife Conservation Society in Costa Rica, University of Dar es Salaam in Tanzania, L' Institut Halieutique et des Sciences in Madagascar, Ministry of Environment in Cambodia and the University of the South Pacific and the IOI in Fiji.

Frontier also works with in-country specialists in Central and South America, Africa, South East Asia and Australasia to offer Teaching, Community and wildlife conservation programs to students and non students above the age of 17.

Please find enclosed the web links to Frontiers Science and Teaching/Community Newsletters.

http://www.frontier.ac.uk/library/documents/MISCDOCS/NewsletterSummer09_MS.pdf

Frontier releases these newsletters 4 times a year. It illustrates what Frontier accomplishes with the data that's been collected by the volunteer, as well as documenting what schools, medical centers and shelters have been built in the area, and the personal journey and experiences the volunteer encounters whilst teaching in the schools and community. It is a great way for those considering a project to learn from the experiences and achievements of those who have already volunteered, before embarking on a project themselves.

The presentation is designed for all students looking to gain cultural experiences, credits, independent research credits, internships and qualifications abroad!
