WORK-STUDY RESEARCH ASSISTANT PROGRAM

Guidelines for Faculty Posting a Research Assistant Position

Program Overview

The Work-Study Research Assistant Program is designed to help high-need students develop research skills and explore their academic interests. Our expectation is that the research assistant will be substantively engaged in your research/creative endeavors. These positions are not to be exclusively clerical or lab upkeep positions.

Federal Work-Study

Work-Study is a need-based financial aid program, through which students can earn the designated amount of the award through employment in an eligible position. Funds are limited and are awarded based on financial need and order of application filing date to eligible full-time students who submitted a FAFSA by the federal on-time deadline. Students may only earn up to the limit of their Work-Study awards for the period of the award (semester or academic year). The maximum is typically $2,200 per academic year. For most students, working an average of 8-10 hours per week over the course of the whole academic year will allow them to earn their full award amount.

Developing a Work-Study Research Assistant Position

We encourage faculty to consider the following as you determine whether you can commit to hiring/mentoring a research assistant through this program:

- The number of students you wish to hire. Be realistic and keep in mind that the student(s) will need training, supervision, feedback, and guidance.

- The availability of adequate, ongoing work for a student research assistant. Feedback from students suggests that many become frustrated when there is a lack of work or too many research assistants for the volume of work available. Consider what secondary work tasks would be appropriate if there is no new data to enter/analyze, subjects to run, etc. You could, for instance, have your research assistant read relevant literature or other documents, or develop their skills through practice with sample materials, when higher priority tasks are not available.

- The skills necessary for your position, as well as your willingness to train/mentor students through the learning process.

- The potential for growth for a student research assistant in this position. Do you see opportunities for additional responsibility, learning of basic and advanced techniques, development of a more independent project, etc.? Will they have the opportunity to publish, present their research (on or off campus), and/or apply for funding to support the continuation of their research?

- Supervision and collaboration. Will there be anyone, in addition to yourself, who will supervise and assign tasks to the research assistant? Will other faculty members, post-docs, or graduate students work with the research
assistant? If yes, have you discussed the hiring of a work-study research assistant with these individuals? What will be the nature of the research assistant’s collaboration with other members of your research group?

- **Previous work experience.** Freshmen (and other work-study students) may not have previous employment experience. Be realistic in the qualifications that you are seeking. If you are seeking a student with more advanced skills (i.e., programming, lab techniques, etc.), contact OUR to discuss whether a Class III position might be more appropriate. Federal Work-Study is awarded to a relatively small group of undergraduate students, so you may not find students with the specific, advanced qualifications that you are seeking.

- **Job description.** Faculty should develop a job description using whichever of the Class II research job codes is most appropriate to the expected work:
  - Student Equipment Design & Testing Assistant (201)
  - Student Interview & Survey Research Assistant (202)
  - Student Laboratory & Field Analysis Assistant (203)
  - Student Human Behavioral Research Assistant (204)
  - Student Research Review Assistant (205)

**Off-Campus Travel**

Travel to off-campus research locations raises a number of policy and process concerns:

- The student needs to be reimbursed for *any travel expenses* s/he incurs (e.g., mileage, bus fare), and neither work-study nor OUR can cover those costs.
- The student must be compensated for *travel time*, but neither work-study nor OUR can cover those costs.
- Your department would need to designate funds to cover travel costs and would need to handle the reimbursement process, which involves setting up a separate payroll line for the student to be paid for travel time and expenses from another source.
- In addition to reimbursement and payment, there is the matter of minimum insurance coverages for a student driving his/her own vehicle, or for any driver transporting that student. Per Connecticut’s Policy on Motor Vehicles Used for State Business, drivers of personally-owned vehicles traveling on university business must carry at least the minimum insurance coverage (third party liability: $50,000/$100,000; property damage liability: $5,000).

*We advise against involving WSRAP students in off-campus travel unless you and/or your department is willing to cover the associated costs.*
